Letter of Recommendation

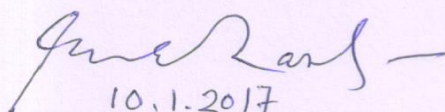

I am very pleased to write about Shrishti Saha shetu, one of the undergraduate students. He is my direct student since 2013. I instructed Shrishti Saha Shetu 'Power System-2' in 5th semester. As a direct teacher, I found him with outstanding competency in solving complex logical problems and thinking in scientific matters. He had a very strong background in engineering problems to reach to the heart of a challenging problem through his deep insight in analyzing it first and to formulate the possible solution through his logical thinking and ingenuity of mathematics.

His pre-university academic result was also outstanding. His quality of realizing and analyzing a topic is impressive. I believe he has a very good potential to pursue his career to doctorate level.

He can communicate well in English both verbally and in writing. He possesses a strong personality and has the quality to work with others in a group, to act as an organizer or to take the leadership of a group just as he is able to work independently. He has good inquisitive and analytical mind with interest towards challenging work and is capable of producing positive results.

I am glad to know that he is trying for admission to your graduate program. For his extra-ordinary qualities, I recommend him very strongly for admission to your graduate program. I also recommend him highly for any possible financial assistance in the form of Fellowship/ Scholarship/ R.A/ T.A.

I wish him every success in his career.

10.1.2017

(Prof. Dr. Rabindra Nath Mahanty)
