Letter of Recommendation

It is my great pleasure to write this letter in support of Shrishti Saha Shetu's application to your esteemed university.

I instructed Shrishti Saha Shetu for the 1st semester course 'Basic Circuit Theory'. He is unquestionably one of the able students in the class and his work consistently reflected a level of insightfulness and attention to detail which unique him. His work in class was consistently prepared on time and he stood out among his peers for his eagerness to engage in the process of learning and discovery.

By witnessing his performance in the class, I'm convinced that he is destined for success. He displayed excellent time management skills and his excellence extended beyond the classroom. In addition to his eagerness to learn, he made a good impression on me and certainly he seemed to get on well with his classmates and teachers at all time span. Considering his academic background and his performance in the classroom, I recommend him an ideal candidate for any research assistantship.

Shrishti Saha Shetu is an outstanding student and I'm delighted to assist him in pursuit of his goals. Studying in your University will give him the tools and the international experience that will lead him to future success. I expect him to respond to the challenges of the master's program with a rigorous devotion and I'm certain that he is capable of handling even the most demanding courses available. He refuses to be daunted by challenging coursework; rather when confronted by complex issues, he devotes himself and seeks further clarification until he has a firm understanding. So I therefore highly recommend him to your institution, without reservation.
